

Toy Adapting Workshops

Inspired by his son Evan, Aaron Miller began altering electronic toys in his garage which eventually lead him to share his talent with others. Aaron's primary goal is to provide toys to children with special needs that will enhance their independence and provide more meaningful play opportunities.

Mr. Miller has also adapted toys for Tech Tools, a program of United Cerebral Palsy of Nebraska. There are seven libraries throughout the state located at various host sites that have a variety of adapted toys and equipment available for check out at no cost to parent's, caregivers and professionals. The equipment is meant for individuals of all ages and abilities. For more information about our Tech Tools program visit our website ucpnebraska.org/Tech Tools.

United Cerebral Palsy is pleased to collaborate with Mr. Miller to provide a series of hands-on workshops located throughout Nebraska to share his skills on how to modify everyday toys for all ages and abilities. These workshops are made possible by the generous support from The Enrichment Foundation. The first workshop was held on August 29 and according to the surveys, the participant's found it to be very informative and worthwhile.

Our next scheduled Toy Adapting Workshop will be held in Kearney on October 21, 2017.
